

# Ab1-bbs1

|                                                                                                    |                                                                            |
|----------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|
| Antibody Name:                                                                                     | <a href="#">Ab1-bbs1</a> from the <a href="#">ZFIN antibody database</a> . |
| Other names, clone ids, catalog ids etc.                                                           | BBS1 Antibody (H-300): sc-134455 , bbs1                                    |
| Does it work on zebrafish?                                                                         | yes                                                                        |
| Host organism                                                                                      | Rabbit                                                                     |
| Immunogen organism                                                                                 | Human                                                                      |
| Antibody isotype                                                                                   | IgG                                                                        |
| Antibody type                                                                                      | polyclonal                                                                 |
| Anatomical structures recognized<br>(use terms from the <a href="#">ZFIN Anatomical Ontology</a> ) |                                                                            |
| Recognized target molecules (gene names, domains, epitopes ...)                                    |                                                                            |
| Suppliers                                                                                          | <a href="#">Santa Cruz Biotechnology, Inc.</a>                             |

## Assays Tested

| Assay | Prep | Worked | Notes |
|-------|------|--------|-------|
|-------|------|--------|-------|

## Notes

- Imported from ZFIN Antibody page [Ab1-bbs1](#)
- Immunogen was an epitope corresponding to amino acids 291-590 mapping near the C-terminus of BBS1 of human origin. ([ZFIN Staff](#))
- [Citations for Ab1-bbs1 at ZFIN](#)
