

Research Technician - Washington University School of Medicine

Research Technician: The Mokalled lab at Washington University School of Medicine

Position Summary:

The Mokalled lab is seeking applicants for a Research Technician position in the Department of Developmental Biology at Washington University School of Medicine (<http://www.mokalledlab.com/>). Our lab uses zebrafish and mouse model systems to study neural regeneration after spinal cord injury or disease. This position offers mentoring opportunities and opportunities for co-authorships on published manuscripts. Candidates with enthusiasm for neuroscience, regenerative biology, and zebrafish research are encouraged to forward a cover letter, CV, and list of 3 or more references to mmokalled@wustl.edu.

Required qualifications:

- Bachelor's degree with laboratory research experience.
- Experience with zebrafish husbandry or spinal cord research are encouraged.
