

Tenure Track Assistant Professor position - Ohio State

The Ohio State University Department of Biological Chemistry and Pharmacology is holding a search for a **tenure-track Assistant Professor working in the zebrafish model**. We are seeking applications from candidates working in neurodegeneration and/or in areas that complement existing departmental strengths in motor neuron disorders, neuromuscular biology, RNA biology, and epigenetics. The successful candidate will have a lab on the same floor as three other zebrafish groups (Sharon Amacher, Christine Beattie, and James Jontes) and will share a newly-renovated fish facility. Please spread the word and share this email with qualified candidates from your lab and/or institution and encourage them to apply. Applications are due next month, by November 15th.
