Lecturer position - Queen Mary University, London

More information and a link for application can be found here:

https://webapps2.is.qmul.ac.uk/jobs/job.action?jobID=4992

Overview:

Queen Mary University of London, a member of the Russell Group, is one of the UK’s leading research-intensive institutions (5th for outputs in the 2014 Research Excellence Framework). Within Queen Mary, the School of Biological and Chemical Sciences is a large and expanding academic unit, which provides a supportive and friendly environment and encourages interdisciplinary research. The Department of Biological and Experimental Psychology was founded in 2008 and currently comprises 19 permanent academics.

We are seeking to appoint an ambitious research-driven scientist at Lecturer level with a strong publication record as well as significant potential for funding in any area of psychology that builds on current research strengths in the department, but we will consider any area of expertise. The successful candidate will be involved in teaching on our undergraduate programmes (teaching loads are as what would be expected in a research-led institution and reduced in the first two years following appointment).

Our environment offers rich opportunities for collaborative research with strong links to other Schools within the Faculty, to Barts and the London School of Medicine and Dentistry, and to research centres and facilities including:

- Life Sciences Institute
- The Genome Centre
- Centre for Mind and Society
- Centre for Cognitive Science
- The Centre for Digital Music in the School of Electronic Engineering and Computer Sciences
- Centre for Psychiatry
- The Augmented Human Interaction (AHI) laboratory, collaboration between the Interaction, Media and Communication and the Computer Vision research groups.
- The Alan Turing Institute

Candidates should have an excellent academic background with PhD (or equivalent) in Psychology or Biology (or other relevant area) and/or relevant professional qualification and/or equivalent professional experience. Evidence of the development and delivery of research-led teaching and assessment at undergraduate and postgraduate level is also essential.

The post is being advertised with a closing date 14 February 2020.
