

Research Positions - Washington University School of Medicine, St. Louis

Research Positions, Mokalled Lab, Washington University School of Medicine in St. Louis.

The Mokalled lab in the Department of Developmental Biology at Washington University School of Medicine is seeking highly motivated scientists to join our vibrant and collaborative research team (<http://www.mokalledlab.com/>). We use zebrafish spinal cord regeneration as a discovery platform to study spinal cord regeneration across species. Candidates with expertise in zebrafish regeneration models or cell reprogramming models are encouraged to forward a cover letter, CV, and list of 2-3 references to mmokalled@wustl.edu.

The Mokalled Lab
at Washington University School of Medicine

*Glial cell responses to spinal cord injury
using zebrafish and mouse model systems*

*Self-motivated applicants with expertise
in zebrafish regeneration or cell reprogramming models
are encouraged to contact mmokalled@wustl.edu
with a cover letter, CV, and 2-3 references.*
