|-------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Antibody Name: | Ab1-col14a1a from the ZFIN antibody database . |
| Other names, clone ids, catalog ids etc. | anti-zebrafish COLXIV-A , col14a1a |
| Antibody Registry ID. | |
| Does it work on zebrafish? | yes |
| Host organism | Rabbit |
| Immunogen organism | Zebrafish |
| Antibody isotype | |
| Antibody type | polyclonal |
| Anatomical structures recognized (use terms from the ZFIN Anatomical Ontology) | anterior macula ; basal lamina ; dorsal fin fold ; epidermal cell basement membrane ; facial ganglion ; fin fold pectoral fin bud ; gut ; median fin fold ; median fin fold epidermal basal stratum ; olfactory placode ; otic vesicle ; pharyngeal pouch 2 ; pharyngeal pouch 3 ; portion of connective tissue ; primitive meninx ; solid lens vesicle ; trigeminal ganglion ; whole organism |
| Recognized target molecules (gene names, domains, epitopes ...) | col14a1a |
| Suppliers | |

Assays Tested

| Assay | Prep | Worked | Notes |
|----------------------|------|--------|------------------------------------|
| immunohistochemistry | | yes | from ZFIN curation |
| western blot | | yes | from ZFIN curation |

Notes

- Imported from ZFIN Antibody page [Ab1-col14a1a](#)
