

Postdoctoral or Senior Scientist Position - University of Virginia

A postdoctoral or senior scientist position is available in the lab of Dr. David Parichy at University of Virginia to continue studies of macrophage–pigment cell interactions required for long-distance signaling during adult pigment pattern formation of zebrafish and related species (e.g., *Science* 355:1317, 2017; *eLife*, 4:e12401, 2015). Applicants should have experience with live imaging and modern developmental genetic methods, preferably using zebrafish. More information about the lab can be found at: <http://dparichy.as.virginia.edu/>. Please send letters of enquiry with CVs and list of references to: dparichy@virginia.edu.
